

MONARFLEX Ultra 250

Technical Data Sheet

MONARFLEX Ultra 250 mono

MONARFLEX Ultra 250 mono consists of two layers of environmentally friendly Low Density Polyethylene (LDPE) with a strong reinforced monofilament grid. UV stabilized, it is available with or without the unique Monarflex flexible rubber eyelet fixing system which saves time during Installation and at the same time preserves the strength of the sheet.

	Ultra 250 mono
Available Sizes	4.00m x 25m 4.00m x 50m 4 x 2 x 2 / 30m 4 x 2 x 2 / 40m 4 x 3 x 2 / 60m
Thickness	0.250mm
Tensile Strength	5.9 kN/m
Thermal Stability	-40°C to +75°C
Light Transmission	76%
Reinforcement	12 mm x 12mm mono grid 0.38mm green thread
Durability under normal conditions	3 years
Colour	Clear with green grid
Resistance	Water/Rot proof IR/UV Resistant
